

WHAT IS MRET WATER

Water is the foundation of all life on earth. Every part of the body is dependent on water. The functions of our glands and organs will eventually deteriorate if they are not nourished with good clean water. Water is an excellent solvent and assimilation of vital nutrients and proteins occurs through absorption of water. Metabolism, digestion, blood flow and cellular reproduction depend on proper water supply.

If your body isn't properly hydrated, cells will draw water from your bloodstream, which causes your heart to work harder. Meanwhile, your kidneys can't properly purify your blood, and when that happens, some of the kidneys' workload is passed along to the liver and other organs, which can cause them to be severely stressed. Additionally, you can develop a number of minor health conditions such as constipation, dry and itchy skin, acne, nosebleeds, urinary tract infection, coughs, sneezing, sinus pressure, and headaches.

Thus, clean water is essential to health. The water that we drink must be metabolically restructured before it is bio-available to our body. MRET Water Activator does it for us.

Molecular Resonance Effect Technology (MRET) Water Activator is patented in the USA by Dr. Smirnov in February 2000, Patent No.6022479. During the process of activation the subtle low frequency electromagnetic field is imprinted into the water. It closely resembles the natural geomagnetic field found near the healing water springs.

MRET Water acts as a communication medium among the cells. It transmits pre-recorded molecular activity messages to biological systems. Activated Water has many special physiological properties that make it ideal to help the body to restore its quota of structured bio-available water. Any pure drinking water can be converted into the activated state with the help of MRET Water Activator.

MRET Water supports the process of cellular regeneration by means of the hydration of cells with MRET Activated Water. It results in the proper, coherent function of cells and cellular structures which leads to normalization of metabolism, general revitalization of the body and enhancement of health conditions. MRET Water prevents cellular dehydration and slows down the process of aging closely related to the dehydration of cells. It improves nutrient transport and assimilation as well as detoxification of the body. The research conducted on MRET Water confirmed its antibacterial effect, its capacity to substantially increase the main factors of natural cellular resistance to infections and inflammations such as phagocytosis and immune responses, to suppress metabolism of mutated cells and to enhance the homeostasis of the body. MRET Water also enhances and accelerates the life cycle and growth of plants.

Alkalinized, magnetized, clustered and oxygenated waters are not chemically pure because different types of foreign substances have been introduced into them during the production stage. They are unstable, have to be kept refrigerated and have unpleasant taste and smell because of the presence of foreign substances. It is not recommended to drink these types of water on a regular basis as your body may be intoxicated with the foreign substance in the long run.

MRET Activator is a household appliance, not a medical device. Any pure drinking water or other liquid food substances like milk, oil, juice or wine can be activated. You also can use MRET water for cooking and keep cooked food in the refrigerator; to spray your skin and hair. The research on MRET water confirmed that it had the best properties beneficial for health right after the activation and kept substantial part of them after storage at room temperature for several hours, refrigeration for 45 days and heating.
